### **Protective Window Film**

Bekaert Window Film shades ultraviolet radiation, and their Armorcoat protects against storms.

If you don't have Low-E glass in your windows, a high-quality window film will provide UV protection. Other benefits include reduced glare, improved comfort, preservation of upholstery (less fabric fading), and increased privacy with tinted films. Now you can also benefit from storm protection. Broken glass is a huge danger in violent weather, and Armorcoat Safety Window Film provides a passive layer of protection, making windows more shatter resistant and helping hold shards in place upon impact. The installed cost is \$6.50 - \$20 per square foot depending on the complexity of the job. For more information, visit the [Bekaert Web site](#).
