Solar Gard

Two new automotive window film lines are now available to the U.S. market, both offering solar control, ultraviolet light protection, color stability and a lifetime warranty. The Ultra Performance product allows vehicle owners to maintain a clear glass appearance while simultaneously providing a 75-percent visible light transmission (VLT) level, or a lightly tinted, 50-percent version. For customers that still desire the traditional look of darkened tints, Solar Gard Supreme is available in VLT levels of 8, 15, 28 and 40 percent. Both lines block over 99 percent of ultraviolet light, have scratch-resistant coatings and will not interfere with electronics operation.
