Window Area: X 400

" ComputerCut gives me full control – over materials and materials salvage, and site preparation – I can now do it all and I couldn't be happier with the results. But the most important thing ComputerCut has done is allowed me to grow my business. In addition to tinting, I now offer vinyl signage – commercial vehicles, storefronts and logos."

Kevin Allen
Window Wizard, Boaz, AL

ComputerCut Increases Proficiency, Speed and Capability.

Today's marketplace isn't what it used to be.

With information and services available in a micro-second, anyone – even the smallest of businesses – can become tomorrow's industry leader. What's the secret to success? Innovation and efficiency. That's what ComputerCut® is all about.

ComputerCut opens the door to more customers, increased business volume, more rapid job completion, tighter and more efficient inventory control and most importantly, brand new, revenue-generating business avenues. Career-long car tinters, architectural window film dealers, signs and graphics shops, paint protection film installers; all can increase proficiency, speed and capability with ComputerCut.

Why ComputerCut software?

- Easiest software to use on the market today
- Cuts film efficiently
- Saves time
- Tracks inventory
- Over 120,000 online patterns
- For Architectural or Automotive Window Tint and Paint Protection
- Internet based
- Compatible with most plotters
- Graphic design and technical support

Big Business the Easy Way

There are many reasons why purchasing ComputerCut® is the best decision you could make for your business.

Diversify your business

With ComputerCut, there's no limit to the type of customers you can solicit, what you can do, or how big your business can become. The ComputerCut database gives you access to auto window tinting, vinyl graphics and signs, banners, architectural window film, paint protection patterns and more.

Work faster

ComputerCut takes a downloaded pattern and cuts it on a plotter in a matter of minutes. The patterns are carefully cut according to established specifications, so any trimming will be minimal. Our proprietary software cuts film unsupervised while you attend to your customers.

Multiple databases

ComputerCut has different customizable databases for automotive, paint protection, flat glass applications, glass art and decals. In all, ComputerCut offers over 120,000 patterns. Plus, ComputerCut allows dealers to keep their custom jobs in a personal database. You can create your own designs with practically any design program - Corel Draw®, Adobe Illustrator®, Freehand®, Inkscape Digital Graphics or other sign programs. We also offer graphic design for custom work.

Cut costs and inventory

Patterns are sized, then arranged on screen to make maximum use of your film - eliminating up to 20% of waste incurred by hand cutting. By providing your installers with pre-cut film, you maintain tighter control over your inventory.

Complete training

Employee training is a necessity. With ComputerCut, you can reduce the learning curve normally associated with new employee training. That's because you won't have to teach them how to cut patterns precisely and consistently; ComputerCut takes care of it.

Appeals to customers

Consistent, evenly cut patterns mean happier customers. And that means higher profits. The appeal of film not having to be cut on glass or a vehicle is highly compelling - plus, it results in less chance of any damage being done to your customers' property. That makes ComputerCut a win-win prospect for everybody!

Expand your business

Do you already have a plotter? ComputerCut software is compatible with and supports most plotters on the market including those from Roland, Graphtec, Ioline, Summa and others, making it even quicker and easier to grow your business than ever before. Expand your existing plotter's capabilities by using ComputerCut patterns or one of the other custom graphics databases we support.
