

PROTECTED FROM HEAT, GLARE AND FADING

CLEAR VIEWS AND COMFORT WITHOUT COMPROMISE

PRIVATE RESIDENCE | MALIBU, CALIFORNIA

PROBLEM:

Floor-to-ceiling windows were making life uncomfortable inside this three-story home. The new residents loved the views and natural light, but sun shining off the Pacific Ocean created intense heat and headache-inducing glare, and UV rays threatened to prematurely fade their furnishings.

SOLUTION:

Solar Gard® Panorama® Hilite® 40

DEALER:

Bruce Slavich | Advanced Solar Control Tinting, Ventura, California

60%

of solar energy rejected

"Hilite 40 allowed the most open feel possible by preserving the amazing views."

Bruce Slavich | Advanced Solar Control Tinting

2,200 sq ft
of window film
installed in 2 days

99%

of harmful ultraviolet
light blocked

Reduced Heat and Glare

The installation of Panorama Hilite 40 immediately resulted in more comfortable temperatures and cut glare in half. The unique Hilite technology also lowered the windows' interior reflectivity for a subtle look and clearer views, both day and night.

Professional Consultation and Installation

With more than 20 years in the industry, highly experienced Panorama Dealer Bruce Slavich recommended spectrally selective Hilite 40 window film as the "no compromise" choice for the best overall performance.

Protection Against UV Exposure

Panorama Hilite window film protects the homeowners and their furnishings from the sun's damaging rays, while still allowing natural light to enter. Even the "hot" wood floors became cooler underfoot after film application, and are now less likely to prematurely fade.
