

A better environment inside and out.™

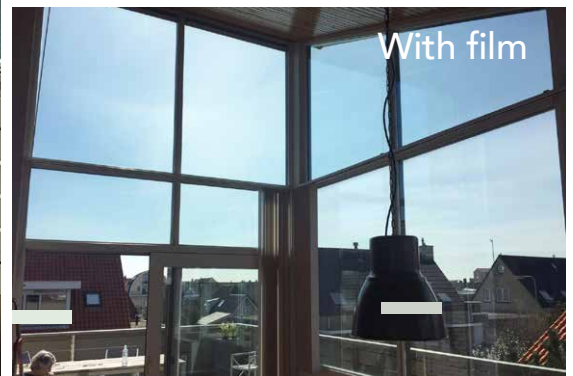

Solar Gard® Solar Window Film: Reference

Solar Gard® Sentinel Plus SX80 (The Netherlands)

Solar Gard improves home owner comfort

Significant heat reduction and yet invisible on the glass

Project Information

Location: The Netherlands

Problem: Excessive heat on sunny days

Solution: Solar Gard® Sentinel Plus SX80

Dealer: Glassprotect, Solar Gard Premium Partner. Visit: www.glassprotect.nl

Year of installation: 2016

Built with many big windows, this house was created to enjoy the outdoor light year round. Home owner: "We love the design of our home as the glass is giving us a lot of natural light. But we are feeling too hot, even during the first sunny days of spring". Ronald Klarholz, owner of Glassprotect and Solar Gard partner since 15 years: "Sentinel Plus SX80 is almost invisible and installed on the outside of the building, blocking a lot of solar heat and therefore creating a higher comfort inside." Especially developed for outside installation, this window film is combining better heat rejection with higher light transmittance than internal films.

The home owner says: "This is the invisible solution for our heat problem we've always been looking for".
