Risk of global threats and
glass breakage

Solution:

Solar Gard® Armorcoat®
14 Mil Clear

Solar Gard Premium Partner:

Glassprotect,
Visit: www.glassprotect.nl

Year of installation: 2015

The Embassy of Japan is a highly secured building in the city center of The Hague, The Netherlands. Surrounded by several other embassy buildings and VIP residences, the risk of today's global threats is real. Part of a major refurbishment project is the installation of several modern security systems and Solar Gard Armorcoat 14mil clear safety film is installed on the windows.

Ronald Klarholz, owner of Glassprotect, Solar Gard dealer says: "With the installation of this special layer of protection on the glass, people inside the building are very well protected against any possible threats and the dangers of flying shards of glass. Armorcoat can offer a wide variety of certifications on their safety and security films to fit the need of the customers."
