

## Solar Control Window Films: Reference Case

### Clarion Hotel improves thermal comfort with Solar Gard QX 40

**"The Saint-Gobain Solar Gard® QX 40 window film solution makes the stay at the hotel more comfortable, since the problem with overheating could be solved while maintaining the luminosity and the fantastic view of the airport of Arlanda and its surroundings."**

Urban Hägg, Mälarmfilm AB, Premium Partner Saint-Gobain Solar Gard

#### PROJECT INFORMATION

##### Building & Location:

Clarion Hotel Arlanda Airport,  
Stockholm

##### Problem:

Excessive heat on sunny days  
in the hotel rooms

##### Solution:

Solar Gard® QX 40, 4.600 m²

##### Solar Gard Partner:

Mälarmfilm AB - [www.malarfilm.se](http://www.malarfilm.se)

##### Year of installation:

2022

The Clarion Arlanda Airport Hotel is a first class hotel in the middle of Arlanda Airport next to the terminals, with fantastic views through the large windows. But as soon as the sun rises and shines directly into the rooms through the large glass partitions, the rooms become too hot and make them very uncomfortable for hotel guests as well as for the staff.

The hotel operator, Storebrand Fastigheter, contacted Mälarmfilm AB, who has been a Solar Gard Premium Partner for many years. Mälarmfilm AB recommended and installed Solar Gard® film on all the windows of the hotel's 430 rooms.

The Solar Gard® QX 40 solution increases thermal and visual comfort. The film reduces heat (up to 72%) and at the same time reduces glare and has a very low visual reflection and a neutral appearance. This is an effective way to reduce heat and still maintain the maximum level of visual light and preserve the views in order to ensure an optimal stay.

Mr. Peter Kitlas, Property Manager at The Clarion Hotel Arlanda Airport on site, is very satisfied with both the solution and with the execution of the whole project.
