

Safety & Security Window Film: Reference Case

Armorcoat® protects The UN Building in Lebanon

“The United Nations Building in Beirut had specified Armorcoat® 8 mil and 14 mil Clear safety and security film for the facade glass partitions.”

Marcellino Souaid, Market Manager Saint-Gobain Solar Gard

PROJECT INFORMATION

Building & Location:
UN Building, Lebanon

Problems:
Explosions

Solutions:
Solar Gard® Armorcoat®
8 & 14 mil Clear/1 500 m²

Solar Gard Partner
WAMCO

Year of installation:
2021

After the unfortunate blast of the Beirut port in 2020, the authorities, employers and building managers all started to take serious precautions against explosions to protect the people from flying glass shards. The United Nations Building in Beirut has specified the Armorcoat® 14 mil Clear safety

film for the 1500 m² facade glass with wet glazing attachment system and Armorcoat AC 8 mil Clear safety for the internal glass partitions on the building. The project was successfully executed in 2021 using Solar Gard Armorcoat AC 14 and 8 mil Clear safety films.
