

Before: Solar Gard Premium Partner Wonderglass installing Sentinel Plus QXN 75.

After: Sentinel Plus QXN 75 is virtually invisible on the windows.

After: Sentinel Plus QXN 75 effectively reduces excessive heat without obstructing the view through the windows.

Solar Control Window Films: Reference Case

Champs Élysées Levi's® Denim and Jeans store chooses QXN 75, invisible but a highly effective heat rejection solution!

“The latest innovation from Saint-Gobain Solar Gard®, the SENTINEL PLUS QXN 75: incredibly effective solar protection, and yet, completely invisible on the shop windows!”

Claude Verniory, Market Manager France, Saint-Gobain Solar Gard

PROJECT INFORMATION

Building & Location:

Levi's® Store Denim and Jeans,
Champs Elysees, Paris

Problem:

Excessive heat and glare,
high energy consumption

Solution :

Solar Gard®
SENTINEL PLUS QXN 75

Installateur Premium Partner :
Wonderglass

Year of installation: 2024

The Levi's Store on the Champs Élysées in Paris entrusted Saint-Gobain Solar Gard to solve their heat issues without obstructing the view through the store's windows.

Solar Gard Sentinel Plus QXN 75 is a nearly clear window film solution and innovation from Solar Gard that provides an incredibly effective solar protection whilst being completely invisible.

Claude VERNIORY says, “What is really special with this film is that it hardly absorbs any solar energy, unlike most other solutions that offer high light transmission combined with low reflection. It reduces the solar heat gain by more than 40%, offering a G-value of 0.36 (depending on the supporting glass).”

It blocks more than 99% of the harmful UV rays, protecting objects and skin. Its UV protection factor is SPF 285+. Combined with the high spectral selectivity, Sentinel Plus QXN 75 offers a fade reduction coefficient of nearly 50%. Yet another reason for choosing Sentinel Plus QXN 75 as solution for shop windows. It has no mirror effect, thus allows all the light to enter, and will not alter colors.”

Thanks to Solar Gard Sentinel Plus QXN 75, it was possible to improve the thermal and visual comfort of the customers and staff at the Levi's® store on the Champs Élysées in Paris.

The installation was professionally executed by **Solar Gard Premium Partner Wonderglass..**
