

WSP3 PLUS - the invisible shield

WSP3 PLUS is an optically clear protective film for automotive windshields. WSP3 PLUS absorbs the impact of standard road hazards and significantly reduces the impact of rock chips, stars, pitting, etc. helping to prolong the lifetime of the windshield.

WSP3 PLUS also includes UV stabilizers which help protect the interior of the car.

WSP3 PLUS is installed by authorized dealers and is thermally fitted to the shape of the windshield ensuring optical clarity thanks to its high quality adhesive and coating.

Once WSP3 PLUS has protected the windshield long enough so it requires replacement, WSP3 PLUS is easily removed and replaced by a new protective WSP3 PLUS layer.

It is important for driver and passenger safety to replace WSP3 PLUS in due time and as soon as clarity of the windshield is impaired.

Please note: It is up to the installer and the end-user to ensure to comply with local regulations regarding application of film on windshields.

Solar Gard Automotive Product Line

LX

Spectrally selective technology offers outstanding heat reduction, optical clarity and color stability. Available in a wide range of darknesses, of which VLT 40, and VLT 70 are the toppers thanks to the high spectral selectivity. Unique in its kind. With 10 year warranty (*).

ULTRA PERFORMANCE

Advanced nanoparticle technology offers the optimum balance of excellent infrared heat rejection and leading film clarity. The high VLT products are specially designed for windscreens (in markets where allowed). Available in VLT 70 and 80.

SOLSTICE

Solar Gard's basic range of nano-ceramic films with rich black color. Non-reflective, Optical clarity for unaltered vision, Electronic signal-friendly: GPS, satellite, AM radio, cellular and TPM systems. 5 year product warranty (*).

CX MAGNUM BLACK

Part of Solar Gard's basic range of nano-ceramic films. Similar to SOLSTICE but a slightly different color tint. Non-reflective, Optical clarity for unaltered vision, Electronic signal-friendly and available in a super dark version: VLT 2. Up to 72% heat rejection and 93% IR rejection. 5 year product warranty (*).

CX MAGNUM IRC

Part of Solar Gard's medium range of nano-ceramic films with a charcoal tint. Non-reflective. Up to 70% heat rejection and 91% IR rejection. Optical clarity for unaltered vision, electronic signal-friendly and available in a super dark version VLT 2. Up to 10 year product warranty (*).

CERAMIC PERFORMANCE

Part of Solar Gard's medium range of nano-ceramic films. Non-reflective, Optical clarity for unaltered vision. Up to 72% heat rejection and 93% IR rejection. Electronic signal-friendly and available in an ultra-light version 85S. Up to 10 year product warranty (*).

SOLAR GARD LEGACY METALIZED FILMS

Metallized films are less popular nowadays. These window films give genuine protection because they reflect heat rather than absorbing it. Ideal solutions for hotter climates. There is no proven relevant interference of the ultra-thin metal layers as to electromagnetic signals. The range has been rationalized and consist now of:

HP Supreme

Excellent heat control and film clarity in an extensive range of shades including the darkest window film on the market. Color stable, guaranteed for 10 years (*).

HP Charcoal

Subtle grey tint and signal friendly for cars with advanced electronics. Still one of the films that give superior thermal comfort.

HP Smoke Plus

Classic smoke grey tint that's a great value with four shades to choose from.

CLEARSHIELD® PRO ACTIV PAINT PROTECTION FILM

A self-healing paint protection film designed to prevent damage to a vehicle's exterior appearance by preventing road dings, chips, and scratches. 10-year limited product warranty (*).

COMPUTERCUT® PRO SOFTWARE

Computerized cutting system with thousands of patterns for both architectural and automotive window films and PPF applications. Download a trial on www.computercutpro/download

01

DRIVING COMFORT

Window film is designed to reject and absorb the solar energy that heats up the inside of your car. This reduces the need to use air conditioning.

02

UV PROTECTION

Solar Gard window film blocks up to 99% of the harmful UVA and UVB rays from the sun that can cause skin cancer with an SPF rating of 285 - 1000.

03

SAFER DRIVING

Window film reduces the glare from the sun, snow and headlights, which can increase visibility to make driving safer.

04

GLARE PROTECTION

Uncomfortable and sometimes dangerous glare from blinding sunlight can instantly and effectively be reduced by up to 97%.

05

ENHANCED PRIVACY

Increase privacy and even helps prevent theft by reducing the outside view of possessions inside the car.

06

PROTECTING YOUR INVESTMENT

Heat rejection coupled with UV protection can prevent sun damage and fading to your car's interior, maintaining the interior of your car longer.

07

CUSTOMIZE YOUR LOOK

Window film can give your car a customized sleek look with a variety of shades and colors. Solar Gard offers many shades to accommodate any driver's preference and minimize glare.
