

Solar Window Films: Refences Case

Enhancing Summer Comfort Through Window Renovation

**Sentinel Plus Silver 35 and SX 50 - Reducing
the sensation of heat and lowered
air-conditioning costs by a factor of four.**

PROJECT INFORMATION

Building & Localisation:

France Travail Offices
Nantes, France

Problem: Excessive heat on sunny
days and high energy costs to cool
office spaces

Solutions:

Solar Gard® Sentinel Plus Silver 35
and SX 50

Solar Gard Premium Partner:

Comatef
Visit www.comatef.fr

Year of installation:

2026

France Travail Nantes features large glazed façades, a typical architectural style from about twenty years ago.

The challenge was that on sunny days, the offices suffered from excessive heat and significant glare.

Renaud Person, engineer, and Xavier Lopez, Solar Gard Premium Partner, explain:

T: +32 9 240 95 66

“By installing the Solar Gard Sentinel Plus Silver 35 and SX 50 window films, we reduced the sensation of heat and lowered air-conditioning costs by a factor of four.”

The installation also refreshed the appearance of the façades and added an extra level of privacy by limiting visibility from the outside.
