

## PERFORMANCE SPECS:

	% Total solar energy rejected	% Visible light transmittance	% Visible light reflectance	% Glare reduction	% IR rejection 780-2500nm (SIRR)
SOLSTICE 5	57	6	5	93	73
SOLSTICE 15	52	13	6	85	63
SOLSTICE 20	48	21	5	77	53
SOLSTICE 30	44	30	6	66	44
SOLSTICE 35	40	38	6	57	39
SOLSTICE 50	36	48	7	46	32

## FAST FACTS:

- Offers up to 57% total solar energy rejection
- Blocks infrared heat radiation up to 93%
- Blocks more than 99% of damaging UV rays
- Is signal-friendly: no interference with GPS, etc.
- Reduces the fading of the car's interior
- Reduces glare up to 93% against blinding sunlight
- A deep rich color
- Is available in a wide range of shades

Performance results were generated with LBNL Windows 7.6 applied to 1/4" (6mm) clear glass and have been calculated and reported in accordance with NFRC standards. Solar Gard® is a participating member of AIMCAL and the IWFA.

Performance results based on film applied to a representative automotive glass with a base visible light transmission of 75%. Due to variations in glass performance, these values should not be used to comply with local tinting laws.

Performance results are subject to variations within industry standards and should be used for comparative purposes only.

# RICH BLACK — OPTICALLY CLEAR

Automotive Window Film

There are many reasons for tinting your vehicle: including protection from harmful rays, comfort, safety and privacy... Solar Gard® window films are like a sunscreen for your car.

## WHY SOLSTICE?

Experience the value of looking and feeling good with Solar Gard® SOLSTICE. Designed to improve driving comfort while protecting you and your vehicle's interior from damaging UV rays, Solstice offers optical clarity and signal-friendly technology to preserve your views and connectivity.

The technology found in SOLSTICE blocks more than 99% of UV rays, rejects up to 73% of infrared rays and has a solar energy rejection (TSER) of up to 57%. Uncomfortable and sometimes dangerous glare from blinding sunlight is reduced by up to 93%.

The technology used in the SOLSTICE gives the vehicle windows a deeper and truer black shade.

The wide range of shades in the SOLSTICE series does not interfere with mobile phones, GPS navigation, satellite radio, and other electronic devices.

## COMFORT COUNTS

- UP TO 57% SOLAR HEAT REJECTION
- UP TO 73% IR REJECTION
- MORE THAN 93% GLARE REDUCTION
- UP TO 48% LIGHT TRANSMITTANCE
- MORE THAN 99% UV BLOCKAGE
- UP TO 1000 SPF (SOLAR PROTECTION FACTOR)

### 01»

**DRIVING COMFORT**  
Window film is designed to reject and absorb the solar energy that heats up the inside of your car. This reduces the need to use air conditioning.

### 02»

**UV PROTECTION**  
Solar Gard window film blocks up to 99% of the harmful UVA and UVB rays from the sun that can cause skin cancer with an SPF rating of 285 - 1000.

### 03»

**SAFER DRIVING**  
Window film reduces the glare from the sun, snow and headlights, which can increase visibility to make driving safer.

### 04»

**GLARE PROTECTION**  
Uncomfortable and sometimes dangerous glare from blinding sunlight can instantly and effectively be reduced by up to 97%.

### 05»

**ENHANCED PRIVACY**  
Increase privacy and even helps prevent theft by reducing the outside view of possessions inside the car.

### 06»

**PROTECTING YOUR INVESTMENT**  
Heat rejection coupled with UV protection can prevent sun damage and fading to your car's interior, maintaining the interior of your car longer.

### 07»

**CUSTOMIZE YOUR LOOK**  
Window film can give your car a customized sleek look with a variety of shades and colors. CERAMIC PERFORMANCE offers various shades to accommodate any driver's preference and minimize glare.

Note: All window films must be applied in accordance with local tint laws by a professional Solar Gard installer.
